Projects

PG - LIFE
It is a web development project. In this we have solved the problems of the people coming from different areas and going to different location for work purpose do not have any idea which place will be best suited for them to live, from where their work environment will be nearer, which place is good for from the perspective of security, food, neighborhood and last but the most important affordable.

E-Commerce Website
It is e-commerce website from where people can buy products it is similar to flipkart and other e-commerce website. it includes features like which people can add item to their cart, view products, buy them, filter them according to their choice. It is developed using MERN stack.

Portfolio
It a website design to showcase my skills, experience, projects other things. It includes features like download my resume, view my projects on GitHub, contact me ect.

Gym Website
It is a registration website for members who want to either join that particular Gym or want to share some tips with newly joined people who are thinking or have just started fitness practices and similarly visa versa if anyone wants to ask anything about how should they proceed keeping themselves fit.
